Portfolio: portfolio-mudasir-mujtaba-s-projects.vercel.app

Professional Summary

- AI & Machine Learning Engineer and Computer Science graduate specializing in Deep Learning, Natural Language Processing, and Computer Vision, with strong full-stack development experience across the MERN and PERN stacks. Skilled in building production-grade AI systems (RAG, LLMs, AI agents, intelligent automation) and developing scalable full-stack web applications using React, Next.js, Node.js, and Express. Adept at taking solutions from research and experimentation through to deployed, production-ready products.

Technical Skills

- Languages:** Python, JavaScript, TypeScript, Java, SQL
- AI/ML:** Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, RAG, Agentic AI, Prompt Engineering
- AI Frameworks:** PyTorch, TensorFlow, Scikit-learn, OpenCV, LangChain, LangGraph, Hugging Face, Streamlit
- Full-Stack (MERN/PERN):** React.js, Next.js, Node.js, Express.js, FastAPI, REST APIs, HTML5, CSS3, Tailwind CSS, Redux, Context API
- Databases:** MongoDB, PostgreSQL, MySQL, Mongoose
- DevOps & Tools:** Docker, Kubernetes, MLflow, Git, GitHub Actions, CI/CD, JWT Authentication

Work Experience

Freelance AI/ML Engineer & Full-Stack Developer – Fiverr (Remote)

May 2024 – Present

AI/ML & Full-Stack Engineer

- Delivered AI solutions involving LLMs, RAG pipelines, NLP, Computer Vision, and intelligent automation for international clients.
- Developed production-ready AI APIs and full-stack web applications, deploying scalable solutions using FastAPI, Node.js, and Docker.

AI Development and Automation Intern – Techrypt (Karachi, Pakistan)

Jun 2025 – Aug 2025

AI & Full-Stack Developer

- Developed AI chatbots and automation workflows using LLMs and N8N for business process optimization.
- Contributed to CRM development through backend and full-stack feature implementation.

Freelance NLP Annotation Lead – CrowdGen (Remote)

Aug 2023 – Oct 2023

NLP Annotation Lead

- Worked on large-scale NLP projects involving multilingual datasets (Sindhi, Urdu, English), supporting AI model training and evaluation.
- Led and coordinated data annotation workflows, collaborating with distributed global teams to meet deadlines and quality benchmarks.

Projects

Lexibot: AI-Powered Legal Assistant (Final Year Project)

Sep 2025 – May 2026

RAG / LLM Developer

- Engineered a RAG-based legal assistant using LLMs and hybrid retrieval to deliver legal research, case summarization, and outcome prediction.
- Processed 29,000+ Pakistani legal documents to provide citation-backed, user-friendly legal guidance.
- GitHub: github.com/mudasirmujtaba/Lexibot-Legal-Assistant-AI-Application

Vision LLM – Industrial Security & Productivity Monitoring System

Apr 2026 – May 2026

Full-Stack / Computer Vision Developer

- Built a full-stack camera analytics platform with a Next.js front-end and a back-end service combining Computer Vision and LLMs for security and productivity monitoring through person detection and recognition.
- GitHub: github.com/MudasirMujtaba/vision_llm

Daily Journal Application – Full-Stack MERN Web App

2025

Full-Stack (MERN) Developer

- Developed a full-stack journaling web application using the MERN stack (MongoDB, Express, React, Node.js) with secure JWT-based authentication and authorization for protected user sessions.
- Implemented complete CRUD functionality for journal entries, global state management with Context API, client-side routing with React Router, and robust form validation using Formik and Yup.
- Built RESTful APIs with Express and Mongoose, integrated Axios for client-server communication with comprehensive error handling, and containerized the application with Docker for consistent deployment.
- GitHub: github.com/mudasirmujtaba/Daily-Journal-App

Candle Agent Bot – Automated Crypto Trading System

Jan 2026

AI / Automation Developer

- Developed an automated cryptocurrency trading bot that analyzes candlestick chart data to generate data-driven buy/sell decisions in real time, integrated with trading APIs and a Telegram notification system for instant alerts.
- GitHub: github.com/mudasirmujtaba/candle_bot_project

Education

BS Computer Science

2022 – 2026

Sukkur IBA University, Sukkur

- CGPA: 3.5 — Thesis: Lexibot - The Judgment: An AI-Powered Legal Assistant

Certifications

- Google Prompting Essentials – Coursera (Google) — Jun 2026
- Google AI Essentials Specialization – Coursera (Google) — Jun 2026
- Claude with Amazon Bedrock – Anthropic / AWS — May 2026
- Large Language Models (LLMs) Concepts – DataCamp — Jun 2026
- Deep Learning and Generative AI – LinkedIn Learning — Nov 2025
- MLOps Essentials: Model Development and Integration – LinkedIn Learning — Dec 2025
- Software Architecture: Patterns for Developers – LinkedIn Learning — Dec 2025
- Python for Data Science, AI & Development – Coursera (IBM) — Feb 2025
- Developing Front-End Apps with React – Coursera (IBM) — Apr 2025
- Developing Back-End Apps with Node.js and Express – Coursera (IBM) — Apr 2025
- AWS Certified Cloud Practitioner (CLF-C02) Cert Prep – LinkedIn Learning — Dec 2025
- Microsoft Azure Fundamentals (AZ-900) Cert Prep – LinkedIn Learning — Dec 2025
- Introduction to MongoDB – MongoDB University — May 2025
